

## What is a Lion?

A lion is a big cat that lives in Africa and parts of Asia. They are known for their beautiful golden fur and their loud roars!

## Where do Lions Live?

Lions usually live in groups called prides. A pride can have a few lionesses (the female lions), one or two male lions, and their little cubs.

## What do Lions Eat?

Lions are meat eaters, which means they like to eat other animals, like zebras and antelopes. They are very strong and work together to catch their food.

## What Sound do Lions Make?

Lions roar very loudly. Their roar can be heard from far away. They roar to communicate with each other and to show they are the king of the jungle!

## What is a Baby Lion Called?

A baby lion is called a cub. Cub lions are very cute and have spots on their fur when they are little!

## Interesting Lion Facts:

- Lions can run very fast, but only for short distances.
- Lions sleep a lot, up to 20 hours a day!
- A group of lions is also called a 'conspiracy' or a 'saw of lions' if you want to use a different name!
