

The Ocean: Home to Many Animals and Birds

The ocean is a big, beautiful place full of life! Many different animals and birds call the ocean their home. Let's explore some of these amazing creatures step by step!

1. What Lives in the Ocean?

In the ocean, you can find:

- **Fish:** They swim around and can be many colors!
- **Whales:** These are huge animals that sing songs!
- **Dolphins:** They are very smart and like to play!
- **Sea turtles:** These gentle creatures glide through the water!
- **Seabirds:** Birds like seagulls and pelicans that live near the ocean and hunt for fish.

2. Why Do Animals Live in the Ocean?

The ocean provides everything animals need:

- **Food:** There are lots of tasty things to eat, like fish and plants!
- **Hiding Places:** Animals like to hide in coral reefs, seaweed, or even inside rocks to stay safe from other animals.

3. Traveling to Find the Right Spot

Some animals travel really far to find the best places to live and have their babies:

- **Migrating Fish:** Fish like salmon swim back to where they were born.
- **Whales:** They swim thousands of miles to warmer waters to have their babies.

4. Conclusion

The ocean is full of wonderful animals and birds. They all have special places where they live, and they travel to find food and have babies. Next time, if you go to the beach or watch a documentary, think about all the amazing life under the sea!
