

The Four Seasons: What Makes Each One Special?

Hi there! Let's take a fun journey through the four seasons: winter, spring, summer, and autumn. Each season is special and has its own unique feelings, activities, and surprises!

1. Winter

Winter is the coldest season of the year. It usually starts around December and lasts until March. During winter, you might see:

- **Snow:** In many places, the ground gets covered in soft, white snow! You can go outside and make snowmen, have snowball fights, or go sledding.
- **Warm Clothes:** Because it's so cold, we wear cozy clothes like jackets, hats, and mittens. They keep us warm and snuggly!
- **Festive Holidays:** Winter has wonderful holidays like Christmas and New Year, where families come together to celebrate.

2. Spring

Spring is a beautiful time when the weather starts to get warmer after winter. It usually starts in March and ends in June. In spring, you can notice:

- **Flowers Blooming:** Flowers begin to grow everywhere! You can see tulips, daisies, and many more colors coming up from the ground.
- **Baby Animals:** Many baby animals are born in spring, like cute chicks and bunnies!
- **Rain Showers:** Sometimes, spring brings gentle rain, which helps flowers and plants grow!

3. Summer

Summer is the hottest season! It usually starts in June and lasts until September. Here's what makes summer special:

- **Sunny Days:** The sun shines bright, and it's a great time to play outside, swim, and have picnics!
- **No School:** For many kids, summer means no school! You can enjoy your vacation and go on fun trips.
- **Long Days:** The days are longer, so you have more time to play and enjoy the sunshine!

4. Autumn

Autumn, also known as fall, comes after summer. It usually starts in September and goes until November. Here's what is special about autumn:

- **Leaves Change Color:** The leaves on the trees change from green to beautiful yellows, oranges, and reds. They fall to the ground, making it look like a colorful carpet!
- **Harvest Time:** Autumn is when many fruits and vegetables are ready to pick, like pumpkins and apples. It's a great time for yummy treats!
- **Halloween:** In October, we celebrate Halloween, where we can dress up in costumes and go trick-or-treating for candy!

Conclusion

So, each season has its own special things that make it unique and fun. Winter has snow, spring has flowers, summer is hot, and autumn has colorful leaves. Which season do you like the most?
