

Alright, let's talk about Fortnite!

Fortnite is like a gigantic playground where you and your friends can play together online. Imagine it's a big imaginary world where you can create your character and go on adventures!

There are different game modes in Fortnite, but the most popular one is the Battle Royale mode. Just like in a game of tag, you and many other players are dropped onto an island and the last person standing wins!

You can build things in Fortnite too, just like using building blocks in real life. Imagine building a giant castle to protect yourself from your friends' attacks!

But remember, just like in real life, it's important to play fair, be kind to others, and have fun together in Fortnite!
