

Who Are the Six in the Picture?

Hello! Today, let's learn about a special number: six! When we say there are six of something in a picture, it means we can count to that number and see six different things or people.

Step 1: **Look Closely**

First, take a good look at the picture. Can you see anything that looks like it belongs together? It could be six animals, six people, or even six toys!

Step 2: **Count One by One**

Now, let's start counting! Use your fingers to help you. You can touch each one as you say it:

1. 1
2. 2
3. 3
4. 4
5. 5
6. 6

Step 3: **Identifying**

If you found six people, can you tell me who they are? Maybe they are friends, family members, or even cartoon characters! If they are animals, can you name the animals?

Step 4: **Review**

Now that we've counted and named them, we know that there are six of them in the picture. Remember, counting is fun and helps us understand how many we have!

So, who can you see in your picture? Take your time, look closely, and let's count together!
