

Fun Facts About Iguanas and Their Colors

Hey there! Did you know that iguanas are really cool reptiles? Let me tell you all about their colors and some fun facts!

1. What Color Are Iguanas?

Iguanas can come in different colors! Most common iguanas are green, but they can also be:

- **Blue** - Some iguanas can be a bright blue color!
- **Orange** - Some iguanas turn orange, especially when they are warm or in the sun.
- **Gray** - Older iguanas may look gray.
- **Mix of Colors** - Iguanas can also have patterns with different colors or shades!

2. Why Are Iguanas Different Colors?

The colors of iguanas help them in many ways:

- **Camouflage:** Their green color helps them blend in with trees and leaves so they can hide from predators.
- **Temperature:** When it's sunny, they might change to a lighter color to help reflect the sun's heat.

3. Unique Features of Iguanas

Besides their cool colors, iguanas have some neat features:

- **Scales:** They have bumpy scales that protect their skin.
- **Long Tails:** Iguanas have long tails that they use to help balance when they climb.
- **Diet:** They eat fruits and leafy vegetables, which makes them herbivores!

4. Did You Know?

Some iguanas can grow to be very big. The Green Iguana can be up to 6.5 feet long!

Conclusion

Iguanas are really amazing reptiles with interesting colors and features. If you see one, take a moment to enjoy their beauty!
