

## Let's Explore Milky Way and Three Musketeers!

Hi there, little friend! Today, we are going to learn about two yummy candy bars: Milky Way and Three Musketeers. They look similar, but they are different inside!

### Milky Way

The Milky Way candy bar has three different parts:

- **Chocolate coating:** The outside is covered in smooth chocolate.
- **Caramel:** Inside, there's a thick layer of sweet caramel that is chewy!
- **Nougat:** There's also a creamy nougat layer underneath the caramel.

So, when you eat a Milky Way, you taste chocolate, chewy caramel, and soft nougat!

### Three Musketeers

The Three Musketeers candy bar is a bit different. It has:

- **Chocolate coating:** Just like Milky Way, it has a coating of chocolate on the outside.
- **Fluffy nougat:** Inside, there is light and fluffy nougat. There's no caramel!

This means when you take a bite of a Three Musketeers, it's mostly chocolate and fluffy nougat, with no chewy caramel like in the Milky Way.

### Fun Summary!

So remember, a Milky Way has chocolate, caramel, and nougat, while a Three Musketeers has just chocolate and fluffy nougat. Both are super delicious, but they have different tastes and textures. Next time you see them, you can tell your friends what makes each one special!
