

Donkey Sounds

Donkeys are wonderful animals that live on farms and in the wild. Just like dogs bark and cats meow, donkeys make their own special sounds too!

What Sounds Do Donkeys Make?

- **Hee-Haw:** This is the most famous sound that donkeys make. When a donkey goes 'hee-haw', it's like they're talking! They might be saying hello or telling their friends to come over.
- **Snort:** Sometimes, a donkey snorts. This sound can mean they are curious or just cleaning their nose!
- **Bray:** Donkeys can also bray, which is a loud sound that can be heard from far away. They might bray when they are excited or trying to find other donkeys.

Why Do Donkeys Make These Sounds?

Donkeys use their sounds to communicate with other donkeys and with people too. They might sound happy, or they might want to let you know they need something. Just like you talk to your friends or family, donkeys use sounds to share their feelings!

Conclusion

Next time you see a donkey, listen carefully to the sounds they make. You'll understand what they are trying to say!
