

Literacy Planet is aligned with the Australian Curriculum by covering all key learning areas, such as reading, writing, and language conventions, based on what students should know and be able to do at each grade level. It includes engaging activities, exercises, and lessons that directly correspond to the curriculum outcomes set by the Australian educational authority. For example, the program may have specific reading activities that focus on comprehension skills outlined in the curriculum for a particular grade. By using Literacy Planet, students can practice and master these skills in a fun and interactive way that directly ties into what they are expected to learn in school.
