

To find out what **0.7 of 60** is, we can follow these simple steps:

1. **Understand what 0.7 means:** The number **0.7** is a way to express a part of a whole number. It means **7 out of 10** or **70%**.
2. **Convert 0.7 into a fraction:** Since 0.7 means 70%, we can think of this as **70/100**.
3. **Simplify the fraction:** We can simplify **70/100** to **7/10** by dividing both the top and bottom by 10.
4. **Finding 1/10 of 60:** To calculate this, we can divide 60 by 10:
 $60 \div 10 = 6$. This means 1/10 of 60 is 6.
5. **Now calculate 7/10 of 60:** Since we found that 1/10 of 60 is 6, we can find 7/10 by multiplying 6 by 7:
 $6 \times 7 = 42$.
6. **Final answer:** So, **0.7 of 60 is 42**.

And that's how you can find 0.7 of 60! You can try this method with other numbers, too!
