

## Objective

By the end of this lesson, you will be able to use math skills to create your own smoothie recipes and run a smoothie bar.

## Materials and Prep

Materials: Paper, pencil, calculator (optional)

Prep: None

## Activities

- **Smoothie Recipe Creation:** Create your own smoothie recipe by choosing ingredients and calculating the quantities needed.
- **Menu Design:** Design a menu for your smoothie bar with prices for each item.
- **Customer Orders:** Practice taking orders from imaginary customers and calculating the total cost.

## Talking Points

- **Choosing Ingredients:** "Let's pick our favorite fruits and decide how much of each to put in our smoothie."
- **Calculating Quantities:** "We need to make sure we have the right amount of each ingredient to make a delicious smoothie."
- **Setting Prices:** "We have to decide how much each smoothie will cost so we can run our smoothie bar."
- **Taking Orders:** "When a customer tells us what they want, we need to add up the prices to tell them the total."
