

Objective

By the end of this lesson, Kelsey will be able to understand the concept of more or less and practice comparing quantities.

Materials and Prep

- Paper
- Pencil or crayons

No prior knowledge needed, just bring your enthusiasm!

Activities

- **More or Less Drawings:** Draw two sets of objects on the paper. Ask Kelsey to color the set that has more objects.
- **Sorting Game:** Prepare a mix of small toys or objects. Let Kelsey sort them into two groups - more and less.
- **Counting Challenge:** Show Kelsey two groups of objects and ask which group has more or less. Then count the objects in each group together.

Talking Points

- **Point 1:** "Let's look at these two groups. Can you tell me which group has more colors?"
- **Point 2:** "Now, let's sort these toys. Can you put the ones with more wheels in this group and the ones with less wheels in the other?"
- **Point 3:** "Great job! Now, can you count how many apples are in this group and how many in that group? Which has more?"
