

## Objective

By the end of this lesson, you will be able to learn fun facts about North America and understand its geography.

## Materials and Prep

- Map of North America
- Coloring pencils or crayons
- Blank paper

No prior knowledge is needed for this lesson, just bring your curiosity!

## Activities

- **Color the Flag:** Print out the flag of the United States and color it in with your favorite colors.
- **Map Challenge:** Look at the map of North America and try to locate the United States, Canada, and Mexico.
- **Animal Fun:** Learn about animals native to North America like the bald eagle, grizzly bear, and beaver. Draw your favorite one!

## Talking Points

- **North America:** "North America is a continent where countries like the United States, Canada, and Mexico are located."
- **Flags:** "Each country in North America has its own flag with different colors and symbols."
- **Geography:** "Geography is about learning the different landforms and bodies of water on maps."
- **Animals:** "North America is home to many amazing animals like the bald eagle, which is the national bird of the United States."
- **Exploration:** "Exploring different countries and their cultures is a fun way to learn about the world."
