

## Objective

By the end of this lesson, you will be able to build your own unique Lego creation and understand the basics of engineering and design.

## Materials and Prep

Materials needed: Various Lego bricks and pieces

No prior knowledge required, just bring your creativity and imagination!

## Activities

- **Free Building:** Use your Lego pieces to build anything you can imagine. Let your creativity run wild!
- **Challenge Time:** Set a timer and see how fast you can build a specific object or structure.
- **Story Building:** Create a story using your Lego creation as the main character or setting.

## Talking Points

- **What is Lego?**  
"Lego is a type of toy that consists of interlocking plastic bricks and pieces that you can use to build different things like buildings, vehicles, and even robots!"
- **Why is it fun to build with Lego?**  
"Building with Lego is fun because you can use your imagination to create anything you want. It's like being a master builder!"
- **What can you learn from playing with Lego?**  
"Playing with Lego can help you learn about shapes, colors, and even how things fit together. It's like solving a puzzle while having fun!"
- **Why is it important to follow instructions when building with Lego?**  
"Following instructions when building with Lego helps you learn how to follow steps in order and can make your creations stronger and more stable."
