

Objective

By the end of this lesson, you will be able to understand basic math concepts related to Shiloh and his brothers.

Materials and Prep

- Paper and pencils
- Imagination and curiosity

Activities

- **Counting Fun:** Count how many brothers Shiloh has and write the numbers down.
- **Math with Shiloh:** If Shiloh has 3 apples and his brother takes 1, how many apples are left? Let's solve it together!
- **Shiloh's Shapes:** Draw shapes like circles, squares, and triangles. Count how many sides each shape has.

Talking Points

- **Shiloh and Bros:** "Let's learn math with Shiloh and his brothers today!"
- **Counting is Fun:** "Counting helps us know how many things we have. Let's count together!"
- **Subtraction with Shiloh:** "When we take away something, we do subtraction. Let's see how many apples Shiloh has left!"
- **Shapes and Sides:** "Shapes are all around us. Let's draw some shapes and count their sides."
