

Objective

By the end of this lesson, you will be able to apply geometric concepts to real-life situations inspired by Jujutsu Kaisen.

Materials and Prep

- Paper
- Pencil
- Ruler
- Protractor

No prior knowledge is required, just bring your enthusiasm for math and Jujutsu Kaisen!

Activities

1. **Shapes in Jujutsu Kaisen:** Watch a clip from Jujutsu Kaisen and identify different shapes present in the scenes. For example, how many triangles can you find in the character designs or backgrounds?
2. **Design Your Curse Technique:** Create your own curse technique diagram using geometric shapes. Explain how the angles and lines represent different aspects of your technique.
3. **Battlefield Geometry:** Analyze fight scenes in Jujutsu Kaisen and discuss how geometry plays a role in the positioning and movements of the characters. How could understanding angles and distances give a fighter an advantage?

Talking Points

- **Shapes in Jujutsu Kaisen:** "In Jujutsu Kaisen, shapes are used in character designs and backgrounds to convey different emotions and themes. Let's see how many shapes we can identify together!"
- **Design Your Curse Technique:** "Just like in Jujutsu Kaisen, where characters use curse techniques, we can create our own using geometric shapes. What shapes would represent your unique curse technique?"
- **Battlefield Geometry:** "Geometry is not just for textbooks! In Jujutsu Kaisen, fighters use angles and distances strategically in battles. Let's explore how understanding geometry can give a fighter an edge in combat."
