

Objective

By the end of this lesson, you will learn about English, Music, Physical Education, and Science through fun Lego activities!

Materials and Prep

Materials:

- Lego bricks of various colors and sizes
- Pen and paper
- Space for physical activities

Prep:

- Set up a designated Lego building area
- Prepare some music to play during the lesson
- Get ready for some fun physical activities

Activities

- English: Build a Lego structure and describe it using as many adjectives as you can think of. For example, colorful, tall, shiny, etc.
- Music: Create a Lego band by building different instruments. Play music and have your Lego band perform a concert.
- Physical Education: Set up a Lego obstacle course and complete it as fast as you can, incorporating movements like jumping, crawling, and balancing.
- Science: Build a Lego volcano and make it erupt using baking soda and vinegar. Observe and describe the chemical reaction.

Talking Points

- "Today, we are going to have fun with Legos while learning about different subjects!"
- "Adjectives are words that describe things. Can you describe your Lego creation using adjectives?"
- "Music is all around us. Let's create our own Lego band and make some music!"
- "Physical activity is important for our bodies. Let's have some fun with a Lego obstacle course!"
- "Science helps us understand how things work. Let's create a Lego volcano and see a cool eruption!"
