

Objective

By the end of this lesson, you will learn about the history of theme parks, how they are designed, and the different attractions they offer.

Materials and Prep

- Paper
- Coloring materials
- Internet access for research
- Imagination and creativity

No prior knowledge is required, just come ready to have fun!

Activities

- **Design Your Own Theme Park:** Imagine you are creating your own theme park. Draw a map of the park with different themed areas and attractions.
- **Research a Theme Park:** Choose a famous theme park and research its history, popular rides, and special events. Create a poster or presentation to share what you learned.
- **Create a Theme Park Ride:** Design a new ride for a theme park. Draw a detailed sketch of the ride and write a description of its features and thrills.

Talking Points

- **History of Theme Parks:** "Theme parks have been around for many years and offer a place where people can have fun and enjoy rides and attractions."
- **Designing a Theme Park:** "Theme parks are carefully designed to create a magical and immersive experience for visitors. Architects and engineers work together to create thrilling rides and beautiful landscapes."
- **Popular Theme Park Attractions:** "Theme parks offer a variety of attractions, including roller coasters, water rides, shows, and themed areas based on movies or fairy tales."
- **Safety at Theme Parks:** "Safety is a top priority at theme parks. Ride operators and staff undergo training to ensure that visitors have a safe and enjoyable experience."
- **Environmental Impact:** "Theme parks are working to reduce their environmental impact by implementing recycling programs, using energy-efficient technologies, and preserving natural habitats within the park."
