

Objective

By the end of this lesson, you will have a better understanding of Artificial Intelligence and its impact on our world today.

Materials and Prep

- Computer or tablet with internet access
- Paper and pen for notes
- Curiosity and willingness to learn!

Activities

- Watch a short video on Artificial Intelligence to get an overview of the topic.
- Research and write down three interesting facts about Robin Li, a pioneer in the AI field.
- Imagine and draw a robot that uses Artificial Intelligence to help people in their daily lives.
- Discuss with a family member or friend how AI technology can be both exciting and potentially challenging for society.

Talking Points

- Artificial Intelligence is like teaching a computer to think and learn on its own. It's like having a smart robot as a friend!
- Robin Li is a brilliant inventor who has contributed a lot to the development of AI. One of his famous quotes is, "Artificial intelligence will change the way we live and work in the future."
- AI can help us in many ways, like predicting the weather, playing games, and even helping doctors diagnose diseases more accurately.
- However, some people worry that AI might become too powerful and take over our jobs. It's important for us to use AI responsibly and ethically.
