

Objective

By the end of this lesson, the student will be able to identify different types of plants and understand their importance in the environment.

Materials and Prep

- Plants vs Zombies 2 game (or images from the game)
- Paper and crayons for drawing
- Access to a garden or plant pot

No prior knowledge needed, just enthusiasm for learning!

Activities

- Play Plants vs Zombies 2 game together and identify different plants in the game.
Discuss the characteristics of each plant and why they are important in defending against zombies.
- Go to the garden or observe a plant pot and identify real-life plants.
Encourage the student to touch and smell the plants while discussing their colors and shapes.
- Create a drawing of their favorite plant from the game or from real life.
Ask the student to explain why they chose that specific plant and what they like about it.

Talking Points

- Plants are living things that need water, soil, and sunlight to grow.
"Plants are like us, they need water and sunlight to be healthy!"
- Plants produce oxygen for us to breathe and provide food for animals.
"Plants give us air to breathe and food for our animal friends!"
- Each plant is unique and has different shapes, colors, and sizes.
"Plants can be big, small, red, green, or even have funny shapes like in the game!"
