

## Objective

By the end of this lesson, you will learn about plants, zombies, and how they interact in the game Plants vs. Zombies 2. You will also improve your English, Math, Science, and Physical Education skills through fun activities related to the game.

## Materials and Prep

- Computer or tablet with Plants vs. Zombies 2 game installed
- Paper and pencils for Math activities
- No prior knowledge needed, just your enthusiasm and willingness to learn!

## Activities

- **Art:** Draw your favorite plant and zombie from the game. Be creative with colors and designs!
- **English:** Write a short story where the plants and zombies team up to face a new challenge. Use your imagination!
- **Math:** Calculate how many sun points you need to plant a specific set of plants in the game. Practice addition and multiplication!
- **Physical Education:** Create a mini obstacle course inspired by the game. Jump over obstacles like the plants defend against the zombies!
- **Science:** Research and write about the real-life plants that inspired the plants in the game. Learn about their characteristics and uses!

## Talking Points

- **Plants vs. Zombies Theme:** "Plants and zombies are fighting against each other in a fun game where you get to strategize and protect your home."
- **Plant Types:** "There are different types of plants in the game, each with unique abilities. Some shoot peas, some explode, and some create barriers."
- **Zombie Varieties:** "Zombies come in various forms with different strengths. Some are fast, some are tough, and some even fly!"
- **Sun Points:** "In the game, you need sun points to plant your defenses. Collecting sun points efficiently is key to winning battles."
- **Strategic Thinking:** "To succeed in the game, you need to think ahead and plan your defenses carefully. It's like solving a puzzle!"
