

Objective

By the end of this lesson, you will be able to understand the basics of interior design and create your own mini interior design project.

Materials and Prep

Materials needed: paper, colored pencils/markers, ruler, scissors, glue

No prior knowledge needed, just bring your creativity!

Activities

- Activity 1: Create a vision board - Cut out pictures of furniture, colors, and patterns from magazines and create a collage of your ideal room design.
- Activity 2: Room layout design - Use the ruler to draw a floor plan of your dream room. Decide where the furniture will go and how the room will be organized.
- Activity 3: Color palette creation - Experiment with different color combinations and create a color palette for your room design.

Talking Points

- "Interior design is like creating a puzzle where you get to decide how all the pieces fit together."
- "Colors can affect how we feel in a room. Bright colors can make us feel energized, while soft colors can make us feel calm."
- "Think about the function of the room - Is it a place to relax, study, or play? Your design should reflect the purpose of the room."
- "Balance is important in design. Make sure the elements in your room design are distributed evenly to create harmony."
- "Don't be afraid to mix patterns and textures to add visual interest to your design."
