

## Objective

By the end of this lesson, the student will be able to identify farm animals, understand basic math concepts through counting farm animals, create art related to farm animals, and appreciate music inspired by farm animals.

## Materials and Prep

- Toy farm animal figures
- Paper and crayons
- Noise-making objects (e.g., bells, wooden sticks)
- Music player for farm animal sounds
- Prepare a farm animal-themed playlist

No prior knowledge needed, just enthusiasm and curiosity!

## Activities

- **Art:** Have the student draw their favorite farm animal using the crayons.
- **Math:** Count the number of farm animal figures together and practice counting out loud.
- **Music:** Play farm animal sounds and have the student use noise-making objects to mimic the sounds.

## Talking Points

- Farm animals live on a farm. They include cows, pigs, chickens, and sheep.
- *Cows say "moo", pigs say "oink", chickens say "cluck", and sheep say "baa".*
- Counting helps us know how many things there are. Let's count how many farm animals we have!
- *Can you draw a big cow on the paper? Use the brown crayon for its spots!*
- Music can sound like the animals we see on the farm. Let's make music like a farm animal!
