

Objective

By the end of this lesson, the student will be able to create, customize, and play their own quizzes on Quizizz. They will also learn how to analyze results and improve their quizzes based on feedback.

Materials and Prep

- Device with internet access (computer, tablet, or smartphone)
- Quizizz account (free to create)
- Paper and pen for brainstorming quiz questions
- Timer (optional for timed quizzes)

Before starting the lesson, ensure that the student has a Quizizz account set up and is familiar with the basic navigation of the website.

Activities

• Brainstorming Session

The student will spend 15 minutes brainstorming topics they are passionate about or subjects they want to quiz others on. They can write down at least 5 topics and choose one to focus on for their quiz.

• Create a Quiz

Using Quizizz, the student will create a quiz based on the chosen topic. They will formulate at least 10 questions with multiple-choice answers. Encourage creativity in question types, including true/false and fill-in-the-blank.

• Play the Quiz

Once the quiz is created, the student will invite friends or family to play the quiz. They can set a timer and keep track of scores to make it competitive and fun.

• Review and Analyze

After the quiz, the student will review the results and feedback. They will discuss what questions were most challenging and think about how to improve their quiz for next time.

Talking Points

- "What topic are you most passionate about? This will make your quiz more engaging!"
- "Remember, a good quiz has a mix of easy and challenging questions. What kind of questions can you think of?"
- "How does it feel to create your own quiz? You're not just answering questions; you're designing them!"
- "When you play the quiz, pay attention to what others find difficult. This feedback is crucial for improvement!"
- "What changes would you make for your next quiz based on the results? Continuous improvement is key!"
