

## Objective

By the end of this lesson, the student will be able to identify various animals and the sounds they make, enhancing their understanding of the animal kingdom while developing listening skills and vocabulary.

## Materials and Prep

- No specific materials are needed for this lesson.
- Be prepared to mimic animal sounds and actions to engage the student.
- Have a comfortable space for movement and interaction.

## Activities

- **Animal Sound Imitation:** Take turns making animal sounds. You can start with common animals like a cow, dog, or cat. Encourage the child to mimic the sounds you make.
- **Animal Movement Game:** Pretend to be different animals by moving around the space. For example, crawl like a baby bear or hop like a bunny. This helps develop gross motor skills while having fun!
- **Animal Sound Matching:** Make an animal sound and ask the child to point to or move toward the animal you are pretending to be. This reinforces the connection between the sound and the animal.

## Talking Points

- "What sound does a cow make? Moo, moo!"
- "Can you hop like a bunny? Let's hop together!"
- "Look at me! I'm a dog! Woof, woof!"
- "Let's pretend to be a lion. Can you roar? Roar!"
- "Do you hear that? It's a bird! Tweet, tweet!"
