

## Objective

By the end of this lesson, the student will be able to identify different continents and oceans on a map, understand basic geographical terms, and express interest in exploring different countries.

## Materials and Prep

- Blank paper
- Colored crayons or markers
- Simple world map (can be drawn on paper)
- Imagination and curiosity!

Before the lesson, it's helpful to have a basic understanding of the seven continents and five oceans. Be ready to explain these in simple terms.

## Activities

- **Draw Your Own Map:**

Have the student draw their own version of a world map. Encourage them to include the continents and oceans, using different colors for each. This activity helps them visualize the layout of the world.

- **Continents and Oceans Song:**

Teach a simple song or rhyme about the continents and oceans. Singing helps with memorization and makes learning fun! You can create a catchy tune together.

- **Geography Treasure Hunt:**

Create a treasure hunt where the student has to find objects or pictures that represent different countries or landmarks. For example, a toy Eiffel Tower for France or a small globe.

## Talking Points

- "Did you know that the Earth has seven big pieces of land called continents?"
- "Can you name some of the oceans? They are like big blue blankets covering parts of our planet!"
- "Every continent has different animals, people, and cultures. Isn't that exciting?"
- "If you could visit any country, where would you want to go? What would you like to see?"
- "Maps help us find our way around the world, just like a treasure map helps us find treasure!"
