Objective

By the end of this lesson, Brodi will have a deeper understanding of how to create and play educational games using Kahoot, enhancing his knowledge retention and making learning more interactive and fun.

Materials and Prep

- Access to a computer or tablet with internet connection
- Kahoot account (can be created for free)
- Headphones (optional, for a more immersive experience)
- A list of topics Brodi is interested in (to create Kahoot quizzes)

Before the lesson, ensure that Brodi has created a Kahoot account and is familiar with the platform's interface. It might be helpful to have a few topics in mind for quiz creation.

Activities

- **Quiz Creation:**

  Brodi will select a topic he enjoys and create a Kahoot quiz with at least 10 questions. This will help him learn how to formulate questions and answers effectively.

- **Playing Kahoot:**

  After creating the quiz, Brodi will invite friends or family members to play the quiz with him. This will encourage social interaction and friendly competition.

- **Explore Existing Kahoots:**

  Brodi can search for and play existing Kahoot quizzes on topics he is interested in. This will allow him to see different question formats and styles.

- **Reflection:**

  Brodi will take some time to reflect on what he learned from creating and playing the quizzes. He will write down his thoughts on what worked well and what could be improved.

Talking Points

- "Kahoot is a great way to make learning fun! It turns studying into a game."
- "When creating your quiz, think about the key concepts you want to remember. What questions would help you recall that information later?"
- "Don't hesitate to be creative! Use images and videos in your Kahoot to make it more engaging."
- "Playing with friends can help you learn better. You can discuss the answers and learn from each other."
- "If you get a question wrong, it's not a failure; it's a chance to learn something new!"
- "Kahoot allows you to see how others think. Pay attention to the answers your friends choose and why."
- "Take note of the types of questions that get the most laughs or discussions. Those are often the most memorable!"
- "Reflecting on your experience can help you improve your next quiz. What worked? What didn't?"

- "You can use Kahoot for any subject! Math, science, history—it's all fair game!"
- "Remember, the more you practice creating quizzes, the better you'll get at it!"
- "Kahoot can also be used for revision before tests. It's a fun way to recap what you've learned."
- "Don't forget to share your quizzes with others! They might find them helpful too."
- "Using Kahoot can help you build confidence in your knowledge and presentation skills."
- "Think about what you enjoy most about learning. How can you incorporate that into your quizzes?"
- "Lastly, have fun! The goal is to make learning enjoyable, so let your creativity shine!"
