

Objective

By the end of this lesson, the student will have a better understanding of the Bermuda Triangle, including its history, theories about disappearances, and its cultural impact. The student will also engage in creative activities that enhance their learning experience.

Materials and Prep

- Notebook and pen/pencil for jotting down notes and ideas.
- Access to a computer or tablet for research (optional).
- Art supplies (colored pencils, markers, or paper) for creative activities.
- Map of the Bermuda Triangle area (can be drawn or printed).

Activities

• Research Project:

The student will research the history of the Bermuda Triangle, including famous disappearances and theories. They can create a timeline of events or a short report summarizing their findings.

• Creative Drawing:

Using their art supplies, the student will draw a map of the Bermuda Triangle, marking significant locations and events. They can also illustrate what they think might be happening in the Triangle.

• Story Creation:

The student will write a short fictional story about an adventure in the Bermuda Triangle. They should include elements of mystery and suspense, inspired by the theories they learned.

• Discussion and Presentation:

The student will present their research findings and creative work to a family member or friend, explaining what they learned about the Bermuda Triangle and their personal theories about it.
