

Objective

By the end of this lesson, you will be able to understand the basic geography of Axolotl and its habitat.

Materials and Prep

- Internet access
- Pen and paper

Activities

1. Research Axolotl

Use the internet to research about Axolotl. Find out where they are native to, what their habitat is like, and any interesting facts about them.

2. Create a Map

Based on the information you gathered, create a map of Axolotl's habitat. Include important geographical features, such as rivers, lakes, and any other relevant landmarks.

3. Write a Story

Imagine you are an Axolotl living in its natural habitat. Write a short story describing your daily life, the challenges you face, and the unique characteristics of Axolotl's environment.

Second Grade Talking Points

- "Social Studies is a subject that helps us understand the world we live in."
- "Geography is a part of Social Studies that focuses on studying places, maps, and the environment."
- "Axolotl is a unique animal that lives in Mexico. It is also known as the Mexican walking fish."
- "Axolotl's habitat is mainly in the lakes and canals around Mexico City."
- "They are amphibians, which means they can live both in water and on land, but they prefer to stay in the water."
- "Axolotls have the ability to regenerate or regrow lost body parts, which is a special adaptation."
- "It's important to study geography because it helps us understand different places and how humans and animals interact with their environment."
