

In your online English Lesson in Education Perfect you are going to read about Leafy Sea Dragons, what are they, where do they live, are many still around in the present year of 2023. Draw a picture and find out what colours they mainly come in and how many different species there are. Create a brochure with information on saving these leafy sea dragons / Lesson Planner / LearningCorner.co

Objective

By the end of this lesson, you will be able to read and comprehend information about Leafy Sea Dragons, understand their habitat and population status, create a drawing of a Leafy Sea Dragon, identify their main colors and different species, and create a brochure advocating for the conservation of these creatures.

Materials and Prep

- Computer or device with internet access
- Paper and drawing materials

Prior knowledge of basic reading and writing skills is required.

Activities

1. Read about Leafy Sea Dragons and their characteristics.
2. Create a drawing of a Leafy Sea Dragon, paying attention to its unique features.
3. Research the colors commonly found in Leafy Sea Dragons and identify how many different species exist.
4. Use the gathered information to create a brochure advocating for the conservation of Leafy Sea Dragons. Include facts about their habitat, threats they face, and ways people can help protect them.

Fifth Grade Talking Points

- "Leafy Sea Dragons are fascinating creatures that belong to the seahorse family. They have leaf-like appendages on their bodies, which help them camouflage in their environment."
- "Leafy Sea Dragons are native to the southern coast of Australia, specifically around the waters of South Australia and Victoria."
- "While the exact numbers are uncertain, it is believed that Leafy Sea Dragons are still present in the wild today, but their population is considered vulnerable."
- "Leafy Sea Dragons mainly come in colors such as yellow, brown, and green, which helps them blend in with the seaweed and kelp where they live."
- "There are two recognized species of Leafy Sea Dragons: the Common Leafy Sea Dragon and the Weedy Sea Dragon."
- "Conserving Leafy Sea Dragons is crucial to maintaining the biodiversity of our oceans. By protecting their habitats and raising awareness, we can help ensure their survival."
