

Objective

By the end of this lesson, you will be able to understand the importance of cows in our environment and how they contribute to Earth's ecosystems.

Materials and Prep

Materials: Picture book about cows, paper, crayons, and markers.

Prep: Familiarize yourself with basic cow facts and their role in the environment.

Activities

1. Read a picture book about cows and discuss their physical characteristics and habits.
2. Draw a picture of a cow and its surroundings, then share with your family why cows are important to the environment.

Kindergarten Grade Talking Points

- Cows are big animals that live on farms. They give us milk and help plants grow.
- When cows eat grass, they help spread seeds and make the soil healthy for plants to grow.
- Cows also help farmers by providing milk, which we use to make cheese, yogurt, and ice cream.
