## Third Grade Talking Points

- Origami is an ancient art form from Japan that involves folding paper to create different shapes and figures. You can say, "Origami is like making sculptures out of paper by folding it in special ways."
- Reading the instructions carefully is important in origami. You can say, "Just like how we read stories to understand them, we need to read the instructions for origami carefully to make the right folds."
- Origami can help us improve our fine motor skills. You can say, "Fine motor skills are like using our fingers and hands to do delicate tasks, like folding paper in origami. It's like doing a puzzle with our hands!"
