

## Objective

By the end of this lesson, the Grade 1 student will be able to understand and apply basic arithmetic concepts through Paw Patrol-themed activities.

## Materials and Prep

- Paw Patrol-themed worksheets (available online or created by the teacher)
- Pencil or crayons

No prior knowledge or preparation is required for this lesson.

## Activities

1. Counting with Paw Patrol: Show the student pictures of Paw Patrol characters and ask them to count how many characters are in each picture. Encourage them to use their fingers to keep track if needed.
2. Addition with Paw Patrol: Use Paw Patrol-themed addition worksheets to practice basic addition. For example, show a picture of three Paw Patrol characters and ask the student to add two more characters to find the total.
3. Subtraction with Paw Patrol: Similarly, use Paw Patrol-themed subtraction worksheets to practice basic subtraction. For instance, show a picture of five Paw Patrol characters and ask the student to subtract two characters to find the remaining number.
4. Problem-solving with Paw Patrol: Present the student with simple word problems involving Paw Patrol scenarios. For example, "If Chase had 4 bones and gave 2 bones to Marshall, how many bones does Chase have left?" Help the student visualize the problem using Paw Patrol characters or drawings.

## United States of America: Grade 1 Talking Points

- **Counting:** "Counting is an important skill in math. It helps us understand how many objects or things there are. Let's practice counting using Paw Patrol characters!"
- **Addition:** "Addition is a way of combining numbers to find the total. We can use addition to find out how many Paw Patrol characters there are when we add more characters to a group. Let's solve some addition problems with Paw Patrol!"
- **Subtraction:** "Subtraction is a way of taking away or removing numbers from a group. We can use subtraction to find out how many Paw Patrol characters are left after some characters leave. Let's solve some subtraction problems with Paw Patrol!"
- **Problem-solving:** "Problem-solving is an important skill in math. We can use our math skills to solve real-life problems, just like the Paw Patrol team solves problems in their adventures. Let's practice problem-solving with Paw Patrol scenarios!"
