

## Objective

By the end of this lesson, the student will be able to write a descriptive paragraph about a cosmetology technique or tool.

## Materials and Prep

- Paper
- Pencil or pen
- Access to the internet or cosmetology books (optional)

Before starting the lesson, it would be helpful for the student to have some basic knowledge about different cosmetology techniques and tools.

## Activities

1. **Research:** Have the student research different cosmetology techniques or tools that interest them. They can use the internet or cosmetology books to gather information about the purpose, usage, and benefits of each technique or tool.
2. **Choose a Favorite:** Once the student has gathered enough information, ask them to choose one technique or tool that they find most fascinating or enjoyable.
3. **Descriptive Paragraph:** Instruct the student to write a descriptive paragraph about their chosen technique or tool. The paragraph should include details about its appearance, function, and any unique features. Encourage the use of vivid language and sensory details to bring the description to life.
4. **Peer Review:** Have the student exchange their paragraphs with a classmate or family member for feedback. The reviewer should provide constructive comments on areas that could be improved, such as clarity, organization, or use of descriptive language.
5. **Revise and Edit:** Based on the feedback received, ask the student to revise and edit their paragraph. Emphasize the importance of clarity, coherence, and proper grammar and spelling.
6. **Final Presentation:** Give the student an opportunity to present their descriptive paragraph to the class or family. Encourage them to read it aloud with confidence and enthusiasm. After the presentation, allow time for questions and feedback from the audience.

## Talking Points

- "Today, we will be exploring the world of cosmetology and practicing our descriptive writing skills."
- "First, let's research different cosmetology techniques or tools that interest you. Take notes on their purpose, usage, and benefits."
- "Now, choose one technique or tool that stands out to you the most. What makes it fascinating or enjoyable?"
- "Using your notes, write a descriptive paragraph about your chosen technique or tool. Remember to include details about its appearance, function, and any unique features."
- "Next, exchange your paragraph with a classmate or family member for feedback. Listen carefully to their suggestions for improvement."
- "Based on the feedback you received, revise and edit your paragraph. Pay attention to clarity, organization, and correct grammar and spelling."
- "Finally, it's time to present your descriptive paragraph to the class or family. Read it aloud

with confidence and enthusiasm. Don't forget to answer any questions or address any feedback from the audience."
