

Objective

By the end of this lesson, the student will be able to identify different types of birds and understand some basic characteristics of birds.

Materials and Prep

- Binoculars (optional)
- Bird identification book or printouts
- Paper and crayons
- Access to a window or outdoor area

No prior knowledge or preparation is required for this lesson.

Activities

- Go on a bird-watching adventure: Encourage the student to observe birds in their natural habitat. If possible, provide binoculars to enhance their experience. Ask them to draw or describe the birds they see.
- Create a bird identification chart: Show the student pictures of different birds and help them create a chart with the names and characteristics of each bird.
- Make a bird feeder: Help the student make a simple bird feeder using materials like pinecones, peanut butter, and birdseed. Hang it outside and observe the birds that come to feed.
- Play a bird sounds guessing game: Play different bird sounds and ask the student to guess which bird is making each sound. Provide clues if needed.

Talking Points

- "Birds are animals that have feathers and can fly."
- "Birds come in many different colors, shapes, and sizes."
- "Birds build nests to lay their eggs and raise their babies."
- "Birds have beaks that they use to eat different types of food, such as seeds, insects, and worms."
- "Some birds migrate to different places during different seasons."
