

## Instructions

Welcome to Halloween Math! Grab your pencil and let's solve some spooky math problems. Write your answers in the spaces provided.

### 1. Counting Pumpkins

There are 5 pumpkin patches, and each patch has 4 pumpkins. How many pumpkins are there in total?

### 2. Candy Addition

You have 12 pieces of candy. Your friend gives you 7 more pieces. How many pieces of candy do you have now?

### 3. Ghostly Subtraction

There are 20 ghosts at the haunted house. If 8 ghosts leave, how many ghosts are still there?

### 4. Trick-or-Treating

If you go trick-or-treating for 3 hours and collect 10 candies each hour, how many candies do you have at the end?

### 5. Spooky Shapes

Draw a scary shape that has 3 sides. What shape did you draw?

### 6. Halloween Riddles

What has keys but can't open locks? (Write your answer below!)

### 7. Math Puzzle

Fill in the blanks:

If a bat flies into the underworld at 6 PM, and it takes 2 hours to find its way out, what time will it come out?

\_\_\_\_\_ PM

Great job! You've completed the Halloween Math worksheet!
