

Instructions

Complete the following exercises based on the topics of English and Math. Take your time and do your best!

English Exercise

Read the following paragraph and answer the questions below:

In the Roblox game "Doors," players make their way through a variety of doors in an eerie hotel environment. Each door leads to a different room filled with challenges, puzzles, and often surprising encounters. As players explore, they must be careful to avoid dangers lurking behind some doors while collecting useful items in others. Teamwork is essential as players communicate and strategize to escape the hotel unharmed.

1. What is the main objective of the game "Doors"?
2. Name two types of rooms players can encounter behind the doors.
3. Why is teamwork important in this game? Provide one example from the paragraph.

Math Exercise

Complete the following math problems related to the game:

1. If there are 100 doors in the hotel and you manage to open 25 doors, how many doors do you have left to open?
2. You collect 7 keys from different doors. If each key opens 3 doors, how many doors can you potentially open with all your keys?
3. Imagine you and 4 friends are playing together, making a total of 5 players. If each player finds 8 items in the game, how many items are found in total?

Bonus Question

If you could create a new feature for the game "Doors," what would it be and why? Write 2-3 sentences explaining your idea.
