Instructions

Help Spiderman count the number of webs he has spun. Answer the questions below based on the webs shown in the illustration (imagine a scenario of webs across buildings).

1. If Spiderman spun 5 webs on the first building and 3 webs on the second building, how many webs did he spin in total?

2. Spiderman wants to add 2 more webs on the third building. How many webs will he have spun after adding these?

3. If each web takes Spiderman 10 minutes to spin, how long did he spend spinning webs on the first two buildings combined?

4. Write a short story about Spiderman's adventure while spinning these webs.

5. Draw a picture of Spiderman swinging between buildings with his webs.
