

## Instructions

Today, you will learn about division through fun hands-on activities! Follow the steps below to complete the worksheet. Use the spaces provided to write your answers.

### Activity 1: Sharing Fruits

Imagine you have 12 apples and you want to share them equally with 3 friends. How many apples does each friend get?

Draw a picture to show how you would share the apples.

How many apples will each friend get?

### Activity 2: Grouping Toys

You have 20 toy cars and you want to place them into groups of 4. How many groups can you make?

### Activity 3: Pizza Party

You and your 5 friends are having a pizza party. If you order 2 pizzas and each pizza has 8 slices, how many slices are there in total? How many slices does each person get if you divide all the slices equally?

Total slices:

Slices per person:

### Activity 4: Word Problem

A farmer has 24 carrots. He wants to distribute them equally to 6 bunnies. How many carrots will each bunny get?

## Creative Section

Draw your own division problem that involves sharing something you like (like toys, candies, or

cookies). Write the question below your drawing.
