

Instructions

In this worksheet, you will explore the basics of creating Minecraft mods using MCreator. Follow the questions and prompts to enhance your understanding of the modding process.

1. What is MCreator and how is it used in Minecraft modding?

2. List three features of MCreator that make it user-friendly for beginners.

3. Describe the steps to create a simple mod using MCreator.

4. Explain the importance of testing your mod before sharing it with others.

5. Reflect on your experience with MCreator. What did you find most interesting or challenging?

6. If you could create any mod, what would it be? Describe your idea.
