Instructions

Welcome to the Pokémon Math Adventure! Solve the questions below using your math skills and Pokémon knowledge. Have fun!

1. Pikachu has 3 apples. If he picks 4 more from the tree, how many apples does he have now?

2. There are 5 Poké Balls in a bag. If Ash buys 3 more, how many Poké Balls are there in total?

3. Charizard can fly for 10 minutes. If it flies for 2 times longer, how many minutes does it fly?

4. Squirtle has 8 blue shells. If it gives away 3 blue shells to its friends, how many blue shells does Squirtle have left?

5. There are 4 different Pokémon in the Pokémon Center: Bulbasaur, Charmander, Squirtle, and Jigglypuff. If 2 more Pokémon come in, how many Pokémon are there now?

6. Draw your favorite Pokémon and write one math fact about them! (For example: "Pikachu has 2 ears.")

7. Match the Pokémon with their number of legs:

- Pikachu -

- Charmander -

- Squirtle -

- Bulbasaur -

8. If you have 2 Pokémon and your friend has 3 more Pokémon, how many Pokémon do you both have together?

9. How many Pokémon can you count in 1 minute? Write the number below:

10. Think of a Pokémon and write your favorite thing about them:
